

AVANT RAMPES GARDE

NOTRE HISTOIRE

LES DÉBUTS

L'entreprise est d'abord un fabricant de moules et opère sous la dénomination sociale Formexpert.

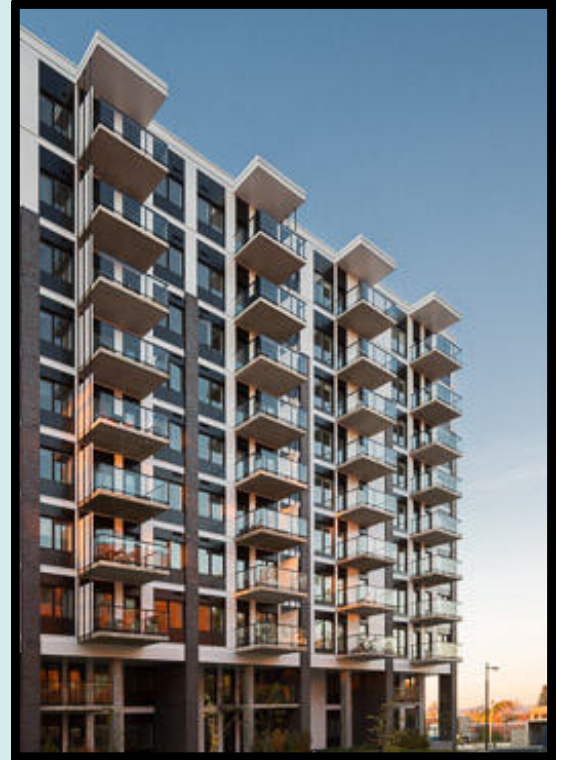

En 2003, la vigueur du marché immobilier local favorise la production de planchers de balcons en fibre de verre.

Nous imposant rapidement comme le leader du domaines à Québec, Formexpert devient Patios Fibrex en 2006 et commence la fabrication de rampes en aluminium.

AUJOURD'HUI

En 2013, l'entreprise crée une filiale haute densité avec Rampe Avant-garde qui atteint des sommets dans le marché avec plus de 2000 portes à livrer et installer avant les vacances de la construction.

En 2014 une nouvelle usine de rampes en aluminium ouvre ses portes et permet à l'entreprise d'avoir la plus grande capacité de production de la province.

OUR HISTORY

THE BEGINNINGS

The company initially started as a mold manufacturer and operated under the business name Formexpert.

In 2003, the strength of the local real estate market boosted the production of fiberglass balcony floors.

Quickly establishing itself as the market leader in Quebec, Formexpert became Patios Fibrex in 2006 and began manufacturing aluminum railings.

TODAY

In 2013, the company created a high-density subsidiary, Rampe Avant-garde, which reached new heights in the market, with over 2,000 units to deliver and install before the construction holidays.

In 2014, a new aluminum railing factory opened, allowing the company to achieve the highest production capacity in the province.

AVANT RAMPES GARDE

Fort de plus de 10 ans d'expérience, Rampes Avant-Garde s'impose comme un leader dans la fabrication de rampe d'aluminium, alliant robustesse et esthétique.

Chez Rampes Avant-Garde, nous avons pour mission de répondre aux besoins des marchés en offrant des solutions architecturales adaptées aux spécificités de chaque projet. Grâce à notre savoir faire, nos produits sont non seulement esthétiques mais aussi conçus afin d'offrir une excellente durabilité.

Avec une production s'élevant à plus de 5000 pi/li par semaine, des délais de livraison maîtrisés et une présence croissante en Ontario et au Québec, Rampes Avant-Garde renforce en continu sa présence à travers l'Est du Canada.

Nous sommes convaincus que notre expertise et notre engagement envers la satisfaction de nos partenaires nous permettront de prospérer ensemble pendant de nombreuses années.

Bienvenue chez Rampes Avant-Garde, où l'innovation rencontre l'excellence.

With over 10 years of experience, Rampes Avant-Garde has established itself as a leader in the manufacturing of aluminum railings, combining strength and aesthetics.

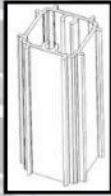

At Rampes Avant-Garde, our mission is to meet market needs by providing architectural solutions tailored to the specificities of each project. With our expertise, our products are not only aesthetically pleasing but also designed to offer excellent durability.

With a production rate of over 5,000 linear feet per week, controlled delivery times, and a growing presence in Ontario and Quebec, Rampes Avant-Garde is continuously strengthening its presence across Eastern Canada.

We are confident that our expertise and commitment to our partners' satisfaction will enable us to thrive together for many years to come.

Welcome to Rampes Avant-Garde, where innovation meets excellence.
